Subject index*

A

Abscess, turpentine, acute and chronic, erythrocyte, survival in dogs with, I. Studies in anemia of inflammatory states, 244

Acanthocytosis, quantitative chromatographic analysis of plasma and red blood cell lipids in patients with, 357

Acid, amino, free, levels in ultrafiltrates of human blood plasma, 110

plasma, chromatography with ion exchange resin loaded paper: assay of ε-aminocaproic acid, 7

bile, serum total, fluorometric determination of, 681

delta-aminolevulinic, and porphobilinogen in urine, quantitative determination of, 568

ε-aminocaproic, absorption, distribution, and excretion of, following oral or intravenous administration to man, 15

assay of: plasma amino acid chromatography with ion exchange resin loaded paper, 7

fatty, fecal, procedure for quantitative analysis of feces with reference to, 878

plasma free, in man, effect of ethanol on, 826

hydrochloric, serotonin release by. I, 462

mucopolysaccharides, urinary excretion of, in normal children and patients with gargoylism, 95

phosphatase test, rapid, for evaluation of androgen activity, 705

serum, glycerophosphatase activity in thrombocytosis, elevation of, 760

silicic, column chromatography, fractionation of bile lipids with, 364

Acid-base relations between serum and cerebrospinal fluid in man under normal and abnormal conditions, 128

Acid-soluble nucleotides in human liver, 963

Adenine, effect of, in aminonucleoside nephrosis, 158

Albumin, I^{131}, turnover in dog, effect of nephrectomy on, 381

Alcohol, polyvinyl, sponge implants, histochemical and biochemical variations in connective tissue of, 713

Aldosterone, urinary, determination, comparison of two methods for, 1026

Aldosterone-progesterone interrelationships in pregnancy, 588

Alpha and beta lipoproteins, radiocarbon and tritium-labeled cholesterol in, after administration to human subjects, 550

Alveolar and arterial carbon dioxide tension, comparison of values of, obtained by two methods with infra-red rapid gas analyzer and arterial blood sample, 509

Amino acid chromatography, plasma, with ion exchange resin loaded paper: assay of ε-aminocaproic acid, 7

free, levels in ultrafiltrates of human blood plasma, 110

Aminonucleoside nephrosis, effect of adenine in, 158

Amphotericin B, effect of, on Histoplasma capsulatum infection in rabbit ear chamber, 496

Androgen activity, rapid acid phosphatase test for evaluation of, 705

Anemia of inflammatory states, studies in. I. Erythrocyte survival in dogs with turpentine abscess, 244

sickle cell, renal excretion of hemoglobin in, 137

Anemic plasma, erythropoietic effects of: factors controlling hemopoiesis, 249

thrombopoietic and leukopoietic effects of: factors controlling hemopoiesis, 262

Antibody, human insulin-binding, and its papain-produced fragments, immunoelectrophoretic analysis of, 891

inhibition test, fluorescent, for histoplasmosis, 1033

*January, pp. 1-178; February, pp. 179-356; March, pp. 357-532; April, pp. 533-712; May, pp. 713-890; June, pp. 891-1068.

Antibody—Cont'd
neutralizing, to ECHO viruses, colorimetric test in HeLa cell system for assay of, 687
Antigen, ragweed pollen, standardization of characteristics of, by paper electrophoresis, 293
Antiglobulin consumption test, autoantibodies to thyroid tissue detected by, 179
Arterial carbon dioxide tension and alveolar, comparison of values of, obtained by two methods with infra-red rapid gas analyzer and arterial blood sample, 509
Artery, renal, effect of unilateral constriction of, I. Studies on mechanism of erythropoietin production, 815
Asian influenza, an attempt to demonstrate viremia in cases with, 1016
Aspergillin O (mold fibrinolysin) in man, clot lysis, coagulation, and fibrinolytic mechanisms after administration of, VII. Fibrinolysis, 799
Autoantibodies to thyroid tissue sediment detected by antiglobulin consumption test, 179
Autoimmunity in liver disease, 533

B

Bacteriuria and urinary bladder lesions, 231
BAETA (bis 2-aminoethyl ether tetraacetate), effect of chelating agent, on radiostrontium excretion in man, 445
BEIs (serum butanol-extractable iodines) of people, differences in, 528
Beta and alpha lipoproteins, radiocarbon and tritium-labeled cholesterol in, after administration to human subjects, 550
and gamma globulin, labeled, metabolism in multiple myeloma, comparison of, 371
Bilateral section of splanchnic nerves, effect of, II. Studies on mechanism of erythropoietin production, 821
Bile acids, serum total, fluorometric determination of, 681
lipids, fractionation of, with silicic acid column chromatography, 364
serum, pigments, study of, in jaundiced patients using the Eberlein solvent-partition method, 956
Biochemical and histochemical variations in connective tissue in polyvinyl alcohol sponge implants, 713
Biopsy, polyvinyl sponge, connective tissue, studies on lipid content of, 730
Bis 2-aminoethyl ether tetraacetate (BAETA), effect of chelating agent, on radiostrontium excretion in man, 445
Bladder lesions, urinary, and bacteriuria, 231
Blood cell lipids, red, and plasma in patients with acanthocytosis, quantitative chromatographic analysis of, 357
Blood—Cont'd
coagulation, influence of fat on: detection with modified thromboplastin generation test, 327
heparinized, hemostatic properties of, after contact with foreign surfaces, 286
human, leukocyte preparations from: evaluation of their morphologic and metabolic state, 779
of leukemic patients capable of incorporating H^3-thymidine, study of effect of therapy on cells in, 412
plasma, human, free amino acid levels in ultrafiltrates of, 110
proteins and lipoproteins, effects of iodinized contrast media upon electrophoretic mobilities of, 118
sample, arterial, comparison of values of alveolar and arterial carbon dioxide tension obtained by two methods with infra-red rapid gas analyzer and, 509
serum, infra-red analysis of Dicumarol in, 667
stored, stability of coagulation factors and metabolic activities of platelets in, 436
values, dependence of, on B_{12} level in large population heavily infected with Diphyllobothrium latum, lognormal distribution of serum vitamin B_{12} levels and, 419
Body size and diet, variability and relationships to: creatinine excretion, 945
Brain tumor and neurological disorders, cerebrospinal fluid serotonin in, determined by spectrophotofluorometric technique, 320
Brucellosis, human and experimental, serum precipitins in, 220
Butanol-extractable iodide, measurement of, in rhesus monkey, 672
iodines, serum (BEIs) of people, differences in, 528

C

Calcium binding, abnormal, associated with hyperglobulinemia, clotting defects, and osteoporosis, 40
and magnesium, organic mercurial effects on renal tubular reabsorption of, and on phosphate excretion in dog, 630
Carbon dioxide tension, alveolar and arterial, comparison of values of, obtained by two methods with infra-red rapid gas analyzer and arterial blood sample, 509
CO_2-dependent penicillin-resistant staphylococcus producing dwarf colonies, human endocarditis due to strain of, 613
Cardiac output determination, comparison of, by direct Fick and dye-dilution method using indocyanine green dye and cuvette densitometer, 345
response, effect of posture on, to increased peripheral demand, 1000

Cartilage, rat, conversion of proline-U-C^{14} to labeled hydroxyproline by, in vitro: effects of hypophysectomy, growth hormone, and cortisol, 741
Catalase test, urinary, in hypertensive vascular disease, evaluation of, 847
Cell in blood of leukemic person capable of incorporating H^3-thymidine, study of effect of therapy on, 412
HeLa system, colorimetric test in, for assay of neutralizing antibodies to ECHO viruses, 687
red blood, lipids, and plasma in patients with acanthocytosis, quantitative chromatographic analysis of, 357
tissue culture, infected with Coxsackie virus, production of fever in rabbits with extracts of, 986
Cellular response, exudative, local: studies of resistance to infection in diabetes mellitus, 1008
Cerebrospinal fluid serotonin in brain tumor and other neurological disorders determined by spectrophotofluorometric technique, 320
and serum, acid-base relations between, in man under normal and abnormal conditions, 128
Chelating agent bis 2-aminoethyl ether tetraacetate (BAETA), effect of, on radiostrontium excretion in man, 445
Children, men, and women, differences in serum butanol-extractable iodines of, 528
normal, and patients with gargoylism, urinary excretion of acid mucopolysaccharides in, 95
Cholesterol, radiocarbon and tritium-labeled, in alpha and beta lipoproteins after administration to human subjects, 550
Chromatographic analysis, quantitative, of plasma and red blood cell lipids in patients with acanthocytosis, 357
technique, simplified, measurement of serum lecithin, lysolecithin, and sphingomyelin by, 335
Chromatography, column, silicic acid, fractionation of bile lipids with, 364
plasma amino acid, with ion exchange resin loaded paper: assay of ε-aminocaproic acid, 7
Clot lysis, coagulation, and fibrinolytic mechanisms after administration of Aspergillin O in man, VII. Fibrinolysis, 799
Clotting defects, hyperglobulinemia, and osteoporosis, abnormal calcium binding associated with, 40
Coagulation, blood, influence of fat on: detection with modified thromboplastin generation test, 327
clot lysis, and fibrinolytic mechanisms after administration of Aspergillin O in man, VII. Fibrinolysis, 799
Coagulation—Cont'd
factors and metabolic activities of platelets in stored blood, stability of, 436
Cobalt^{60}, acute radiation syndrome caused by accidental exposure to, 655
Colonies, dwarf, human endocarditis due to strain of CO_2-dependent penicillin-resistant staphylococcus producing, 613
Color method, one, for determination of mercury in urine, 871
Colorimetric test in HeLa cell system for assay of neutralizing antibodies to ECHO viruses, 687
Column chromatography, silicic acid, fractionation of bile lipids with, 364
Connective tissue in polyvinyl alcohol sponge implants, histochemical and biochemical variations in, 713
sponge biopsy, studies on lipid content of, 730
Corticosteroids in human beings, effect of, on secretion of large molecular substances of gastric juice, 575
Cortisol, hypophysectomy, and growth hormone, effects of: conversion of proline-U-C^{14} to labeled hydroxyproline by rat cartilage in vitro, 741
Counting of tritiated thymidine in tissues, 174
Coxsackie virus, production of fever in rabbits with extracts of tissue culture cells infected with, 986
Creatinine excretion: variability and relationships to diet and body size, 945
Cuvette densitometer and indocyanine green dye, comparison of cardiac output determination by direct Fick and dye-dilution method using, 345
Cystic fibrosis of pancreas, lipoprotein lipase in, 302

D

Delta-aminolevulinic acid and porphobilinogen in urine, quantitative determination of, 568
Densitometer, cuvette, and indocyanine green dye, comparison of cardiac output determination by direct Fick and dye-dilution method using, 345
Diabetes mellitus, studies of resistance to infection in: local exudative cellular response, 1008
Dicumarol in blood serum, infra-red analysis of, 667
Diet and body size, variability and relationships to: creatinine excretion, 945
and isolation, effect of, on urinary excretion, I. Pseudouridine metabolism, 620
Differential counting, radioactive inert-indicator method for intestinal absorption utilizing, 513

Diffusion, gel, precipitin technique, estimation of eight serum proteins by, 859
Diphyllobothrium latum, lognormal distribution of serum vitamin B_{12} levels and dependence of blood values on B_{12} level in large population heavily infected with, 419
Disease, hemoglobin H and Lepore trait, studies in, II. Erythrokinetics in thalassemia, 147
M, new variant: hemoglobin $M_{Chicago}$, 918
hypertensive vascular, evaluation of urinary catalase test in, 847
liver, autoimmunity in, 533
Diuretic effect of mannitol in nephrotic edema, 309
Dog, effect of nephrectomy on I^{131} albumin turnover in, 381
erythropoiesis in, effect of thyroid administration on, 926
experimental staphylococcal endocarditis in. III, 481
phosphate excretion in, organic mercurial effects on, and on renal tubular reabsorption of calcium and magnesium, 630
with turpentine abscess, erythrocyte survival in, I. Studies in anemia of inflammatory states, 244
Dwarf colonies, human endocarditis due to strain of CO_2-dependent penicillin-resistant staphylococcus producing, 613
Dye, indocyanine green, and cuvette densitometer, comparison of cardiac output determination by direct Fick and dye-dilution method using, 345

E

Ear chamber, rabbit, effect of amphotericin B on Histoplasma capsulatum infection in, 496
Eberlein solvent-partition method, study of serum bile pigments in jaundiced patients using, 956
ECHO viruses, colorimetric test in HeLa cell system for assay of neutralizing antibodies to, 687
Edema, nephrotic, diuretic effect of mannitol in, 309
Electrophoresis, paper, standardization of characteristics of ragweed pollen antigen by, 293
Electrophoretic mobilities of blood proteins and lipoproteins, effects of iodinized contrast media upon, 118
Endocarditis, human, due to strain of CO_2-dependent penicillin-resistant staphylococcus producing dwarf colonies, 613
staphylococcal, in dogs, experimental, study of. III, 481
Epsilon-aminocaproic acid, absorption, distribution, and excretion of, following oral or intravenous administration to man, 15
assay of: plasma amino acid chromatography with ion exchange resin loaded paper, 7
Erythrocyte, kinetics and loci of destruction of, in tumor-bearing hamsters, 638
and plasma magnesium in health and disease, 195
survival in dogs with turpentine abscess, I. Studies in anemia of inflammatory states, 244
and thrombocyte, human, identification of phospholipids in, 771
Erythrokinetics in thalassemia. II, 147
Erythropoiesis in dog, effect of thyroid administration on, 926
Erythropoietic effects of anemic plasma: factors controlling hemopoiesis, 249
Erythropoietin production, studies on mechanism of. I. Effect of unilateral constriction of renal artery, 815
II. Effect of bilateral section of splanchnic nerves, 821
Ethanol, effect of, on galactose elimination in man, 102
on plasma free fatty acids in man, 826
Excretion and absorption of S^{35}-labeled trimeprazine tartrate, effect of sustained release on, 993
creatinine: variability and relationships to diet and body size, 945
phosphate, in dog, organic mercurial effects on, and on renal tubular reabsorption of calcium and magnesium, 630
radiostrontium, in man, effect of chelating agent BAETA on, 445
renal, sensitivity of parathyroid-mediated response of: phosphate homeostasis, 387
urinary, in gout, psoriasis, leukemia, and heterozygous oroticaciduria, II. Pseudouridine metabolism, 852
isolation and effect of diet on, I. Pseudouridine metabolism, 620
water, factors influencing, in anterior pituitary insufficiency, 833
Exudative cellular response, local: studies of resistance to infection in diabetes mellitus, 1008

F

Fasting ketosis in obese men and women, 605
Fat, influence of, on blood coagulation: its detection with modified thromboplastin generation test, 327
Fatty acids, fecal, procedure for quantitative analysis of feces with reference to, 878
plasma free, in man, effect of ethanol on, 826
Fecal specimens, incineration of, for radioactivity measurement, 169

Feces, procedure for quantitative analysis of, with reference to fecal fatty acids, 878
Fever, production of, in rabbits with extracts of tissue culture cells infected with Coxsackie virus, 986
Fibrin, fluorescein-labeled, use of, for determination of fibrinolytic activity, 1039
Fibrinolysis. VII. Clot lysis, coagulation, and fibrinolytic mechanisms after administration of Aspergillin O in man, 799
Fibrinolytic activity, use of fluorescein-labeled fibrin for determination of, 1039
system, plasmin-plasminogen, in vitro, effects of serotonin on inhibition of, 25
Fibrosis, cystic, of pancreas, lipoprotein lipase in, 302
Fick method, direct, and dye-dilution method using indocyanine green dye and cuvette densitometer, comparison of cardiac output determination by, 345
Fluid, cerebrospinal, and serum, acid-base relations between, in man, 128
spinal, isolation of poliovirus from, 490
Fluorescein-labeled fibrin, use of, for determination of fibrinolytic activity, 1039
Fluorescent antibody inhibition test for histoplasmosis, 1033
Fluorimetric method for determination of phenylalanine in serum, 885
Fluorometric determination of serum total bile acids, 681
Fractionation of bile lipids with silicic acid column chromatography, 364

G

Galactose elimination in man, effect of ethanol on, 102
Gamma globulin and beta, labeled, metabolism in multiple myeloma, comparison of, 371
changes in disease, relation of isohemagglutinin levels to, 753
Gargoylism, patients with, and normal children, urinary excretion of acid mucopolysaccharides in, 95
Gas analyzer, infra-red rapid, and arterial blood sample, comparison of values of alveolar and arterial carbon dioxide tension obtained by two methods with, 509
Gastric juice, effects of corticosteroids in human beings on secretion of molecular substances of, 575
Gel diffusion precipitin technique, estimation of eight serum proteins by, 859
Globulin, gamma and beta, labeled, metabolism in multiple myeloma, comparison of, 371
changes in disease, relation of isohemagglutinin levels to, 753
Glucagon I^{131}, preparation of high specific activity, 351
Glycerophosphatase activity, serum acid, in thrombocytosis, elevation of, 760
Gout, psoriasis, leukemia, and heterozygous oroticaciduria, urinary excretion in, II. Pseudouridine metabolism, 852

H

H^3-thymidine, study of effect of therapy on cells in blood of leukemic patients capable of incorporating, 412
Hageman trait, studies on inheritance of, 980
Hamsters, tumor-bearing, kinetics and loci of destruction of erythrocytes in, 638
HeLa cell system, colorimetric test in, for assay of neutralizing antibodies to ECHO viruses, 687
Hemodialyzer, Skeggs-Leonards, modified, efficiency of, 932
Hemodynamic changes associated with Valsalva maneuver in men and women, 275
Hemoglobin H disease and Lepore trait, studies in, II. Erythrokinetics in thalassemia, 147
human, immunologic studies of, 401
M disease, new variant of: hemoglobin $M_{Chicago}$, 918
$M_{Chicago}$: new variant of hemoglobin M disease, 918
renal excretion of, in sickle cell anemia, 137
Hemoglobinemia and methemalbuminemia, spontaneously occurring, observations on, renal excretion of hemoglobin in sickle cell anemia, 137
Hemoglobinopathies, heterozygous S, and chronic hypoxia, 792
Hemolytic effect of primaquine, XV. Role of methemoglobin, 905
Hemopoiesis, factors controlling: erythropoietic effects of anemic plasma, 249
thrombopoietic and leukopoietic effects of anemic plasma, 262
Hemostatic properties of heparinized blood after short contact with foreign surfaces, 286
Heparin and heparitin monosulfates, anticoagulant effects of, and comparative lipoprotein lipase activating, 1020
Heparin-induced thrombocytopenia in man, 430
Heparinized blood, hemostatic properties of, after short contact with foreign surfaces, 286
Heparitin monosulfates and heparin, anticoagulant effects of, and comparative lipoprotein lipase activating, 1020
Heterologous transplantation of mouse plasmacytoma, effects of. I, 81
Heterozygous oroticaciduria, gout, psoriasis, and leukemia, urinary excretion in, II. Pseudouridine metabolism, 852

Heterozygous—Cont'd
S hemoglobinopathies and chronic hypoxia, 792
Histochemical and biochemical variations in connective tissue in polyvinyl alcohol sponge implants, 713
Histoplasma capsulatum infection in rabbit ear chamber, effect of amphotericin B on, 496
Histoplasmosis, fluorescent antibody inhibition test for, 1033
pulmonary, acute, in laboratory workers, 236
Homeostasis, phosphate: sensitivity of parathyroid-mediated response of renal excretion, 387
Hormone, growth, human, assay of, with I^{131}-labeled antibody, 520
hypophysectomy, and cortisol, effects of: conversion of proline-U-C^{14} to labeled hydroxyproline by rat cartilage in vitro, 741
Human blood, leukocyte preparations from: evaluation of their morphologic and metabolic state, 779
plasma, free amino acid levels in ultrafiltrates of, 110
endocarditis due to strain of CO_2-dependent penicillin-resistant staphylococcus producing dwarf colonies, 613
growth hormone, assay of, with I^{131}-labeled antibody, 520
hemoglobins, immunologic studies of, 401
insulin-binding antibody and its papain-produced fragments, immunoelectrophoretic analysis of, 891
liver, acid-soluble nucleotides in, 963
thrombocytes and erythrocytes, identification of phospholipids in, 771
Hydralazine-1-C^{14}, distribution of, after injection into normal mice, 456
Hydrochloric acid, serotonin release by. I, 462
Hydroxyproline, labeled, conversion of proline-U-C^{14} to, by rat cartilage in vitro: effects of hypophysectomy, growth hormone, and cortisol, 741
Hyperglobulinemia, clotting defects, and osteoporosis, abnormal calcium binding associated with, 40
Hypertensive vascular disease, evaluation of urinary catalase test in, 847
Hypophysectomy, growth hormone, and cortisol, effects of: conversion of proline-U-C^{14} to labeled hydroxyproline by rat cartilage in vitro, 741
Hypoxia, chronic, and heterozygous S hemoglobinopathies, 792

I

I^{131} albumin turnover in dog, effect of nephrectomy on, 381
glucagon, preparation of high specific activity, 351
I^{131}-labeled antibody, assay of human growth hormone with, 520
myeloma and macroglobulin proteins, turnover and distribution of, 65
Immune response, secondary, prevention of with 6-mercaptopurine, 542
Immunoelectrophoretic analysis of human insulin-binding antibody and its papain-produced fragments, 891
Immunologic studies of human hemoglobins, 401
Implants, sponge, polyvinyl alcohol, histochemical and biochemical variations in connective tissue of, 713
Incineration of fecal specimens for radioactivity measurement, 169
Indocyanine green dye and cuvette densitometer, comparison of cardiac output determination by direct Fick and dye-dilution method using, 345
Inert-indicator method, radioactive, for intestinal absorption utilizing differential counting, 513
Inflammatory states, studies in anemia of. I. Erythrocyte survival in dogs with turpentine abscess, 244
Influenza, Asian, an attempt to demonstrate viremia in cases with, 1016
Infra-red analysis of Dicumarol in blood serum, 667
rapid gas analyzer and arterial blood sample, comparison of values of alveolar and arterial carbon dioxide tension obtained by two methods with, 509
Inheritance of Hageman trait, studies on, 980
Insulin-binding antibody, human, and its papain-produced fragments, immunoelectrophoretic analysis of, 891
Intestinal absorption, radioactive inert-indicator method for, utilizing differential counting, 513
Iodide, butanol-extractable, measurement of, in rhesus monkey, 672
Iodines, serum butanol-extractable (BEIs) of people, differences in, 528
Iodinized contrast media, effects of, upon electrophoretic mobilities of blood proteins and lipoproteins, 118
Ion exchange resin loaded paper, plasma amino acid chromatography with: assay of ϵ-aminocaproic acid, 7
Isohemagglutinin levels, relation of, to gamma globulin changes in disease, 753

J

Jaundiced patients, study of serum bile pigments in, using the Eberlein solvent-partition method, 956
Juice, gastric, effects of corticosteroids in human beings on secretion of molecular substances of, 575

K

Ketosis, fasting, in obese men and women, 605
Kinetics and loci of destruction of erythrocytes in tumor-bearing hamsters, 638

L

Laboratory workers, acute pulmonary histoplasmosis in, 236
Lecithin, lysolecithin, and sphingomyelin, serum, measurement of, by simplified chromatographic technique, 335
Lepore trait and hemoglobin H disease, studies in, II. Erythrokinetics in thalassemia, 147
Letter from the editors, 1
Leukemia, gout, psoriasis, and heterozygous oroticaciduria, urinary excretion in, II. Pseudouridine metabolism, 852
Leukemic patients capable of incorporating H^3-thymidine, study of effect of therapy on cells in blood of, 412
Leukocyte preparations from human blood: evaluation of their morphologic and metabolic state, 779
Leukopoietic and thrombopoietic effects of anemic plasma: factors controlling hemopoiesis, 262
Lipase, lipoprotein, activating, comparative, and anticoagulant effects of heparin and heparitin monosulfates, 1020
  in cystic fibrosis of pancreas, 302
Lipid, bile, fractionation of, with silicic acid column chromatography, 364
  content of polyvinyl sponge biopsy connective tissue, studies on, 730
  red blood cell, and plasma in patients with acanthocytosis, quantitative chromatographic analysis of, 357
Lipolytic activity, plasma, effect of Lipomul infusion on, 558
Lipomul infusion, effect of, on plasma lipolytic activity, 558
Lipoproteins, alpha and beta, radiocarbon and tritium-labeled cholesterol in, after administration to human subjects, 550
  and blood proteins, effects of iodinized contrast media upon electrophoretic mobilities of, 118
  lipase activating, comparative, and anticoagulant effects of heparin and heparitin monosulfates, 1020
    in cystic fibrosis of pancreas, 302
Liver disease, autoimmunity in, 533
  human, acid-soluble nucleotides in, 963
Lognormal distribution of serum vitamin B_{12} levels and dependence of blood values on B_{12} level in large population heavily infected with Diphyllobothrium latum, 419
Lysis, clot, coagulation, and fibrinolytic mechanisms after administration of Aspergillin O in man, VII. Fibrinolysis, 799
Lysolecithin, lecithin, and sphingomyelin, serum, measurement of, by simplified chromatographic technique, 335

M

Macrocryoglobulin, "purified" (Waldenström), physicochemical studies of, 970
Macroglobulin proteins, I^{131}-labeled myeloma and, turnover and distribution of, 65
Magnesium and calcium, organic mercurial effects on renal tubular reabsorption of, and on phosphate excretion in dog, 630
  depletion, effect of, on renal function in rat, 211
  plasma and erythrocyte, in health and disease, 195
Malignant tumors, running syndrome secondary to, I. Effects of heterologous transplantation of mouse plasmacytoma, 81
Man, acid-base relations between serum and cerebrospinal fluid in, 128
  clot lysis, coagulation, and fibrinolytic mechanisms after administration of Aspergillin O in, VII. Fibrinolysis, 799
  effect of chelating agent BAETA on radiostrontium excretion in, 445
    of ethanol on plasma free fatty acids in, 826
  galactose elimination in, effect of ethanol on, 102
  heparin-induced thrombocytopenia in, 430
  woman, and children, differences in serum butanol-extractable iodines of, 528
    hemodynamic changes associated with Valsalva maneuver in, 275
    obese, fasting ketosis in, 605
Mannitol, diuretic effect of, in nephrotic edema, 309
Medical school and research, 3
6-mercaptopurine, prevention of secondary immune response with, 542
Mercurial effects, organic, on renal tubular reabsorption of calcium and magnesium and phosphate excretion in dog, 630
Mercury in urine, one color method for determination of, 871
Metabolic activities and coagulation factors of platelets and stored blood, stability of, 436
  and morphologic state, evaluation of: leukocyte preparations from human blood, 779
Metabolism in multiple myeloma, comparison of labeled beta and gamma globulin, 371
  pseudouridine. I, 620
    II, 852

Methemalbuminemia and hemoglobinemia, spontaneously occurring, observations on, renal excretion of hemoglobin in sickle cell anemia, 137
Methemoglobin, role of, XV. Hemolytic effect of primaquine, 905
Microimmunoelectrophoresis: comparison of template with nontemplate methods, 697
Mold fibrinolysin (Aspergillin O) in man, clot lysis, coagulation, and fibrinolytic mechanisms after administration of, VII. Fibrinolysis, 799
Monkey, rhesus, measurement of butanol-extractable iodide in, 672
Monoamine oxidase activity, studies on, I. Effects of urea on physiologic systems, 396
Monosulfates, heparitin, and heparin, anticoagulant effects of, and comparative lipoprotein lipase activating, 1020
Mouse, normal, distribution of hydralazine-1-C^{14} after injection in, 456
plasmacytoma, effects of heterologous transplantation of. I, 81
Mucopolysaccharides, acid, urinary excretion of, in normal children and patients with gargoylism, 95
Myeloma, I^{131}-labeled, and macroglobulin proteins, turnover and distribution of, 65
multiple, comparison of labeled beta and gamma globulin metabolism in, 371
therapy of, with radioyttrium, 898

N

Nephrectomy, effect of, on I^{131} albumin turnover in dog, 381
Nephrosis, aminonucleoside, effect of adenine in, 158
Nephrotic edema, diuretic effect of mannitol in, 309
Nerves, splanchnic, effect of bilateral section of, II. Studies on mechanism of erythropoietin production, 821
Neurological disorders and brain tumor, cerebrospinal fluid serotonin in, determined by spectrophotofluorometric technique, 320
Nucleotides, acid-soluble, in human liver, 963

O

Obese men and women, fasting ketosis in, 605
Organic mercurial effects on renal tubular reabsorption of calcium and magnesium and phosphate excretion in dog, 630
Oroticaciduria, heterozygous, gout, psoriasis, and leukemia, urinary excretion in, II. Pseudouridine metabolism, 852
Osteoporosis, hyperglobulinemia, and clotting defects, abnormal calcium binding associated with, 40
Oxidase, monoamine, activity, studies on, I. Effects of urea on physiologic systems, 396

P

Pancreas, cystic fibrosis of, lipoprotein lipase in, 302
Papain-produced fragments, immunoelectrophoretic analysis of human insulin-binding antibody and, 891
Paper electrophoresis, standardization of characteristics of ragweed pollen antigen by, 293
Parathyroid-mediated response of renal excretion, sensitivity of: phosphate homeostasis, 387
Penicillin-resistant, CO_2-dependent staphylococcus producing dwarf colonies, human endocarditis due to strain of, 613
Penicillinase, staphylococcal, evaluation of currently used methods for determining, 469
Peripheral demand, increased, effect of posture on cardiac response to, 1000
Phenylalanine in serum, fluorimetric methods for determination of, 885
Phosphatase, rapid acid test, for evaluation of androgen activity, 705
Phosphate excretion in dog, organic mercurial effects on, and on renal tubular reabsorption of calcium and magnesium, 630
homeostasis: sensitivity of parathyroid-mediated response of renal excretion, 387
Phospholipids, identification of, in human thrombocytes and erythrocytes, 771
Physicochemical studies of a "purified" macrocryoglobulin (Waldenström), 970
Physiologic systems, effects of urea on. I. Studies on monoamine oxidase activity, 396
Pituitary insufficiency, anterior, factors influencing water excretion in, 833
Plasma amino acid chromatography with ion exchange resin loaded paper: assay of ε-aminocaproic acid, 7
anemic, erythropoietic effects of: factors controlling hemopoiesis, 249
thrombopoietic and leukopoietic effects of: factors controlling hemopoiesis, 262
blood, human, free amino acid levels in ultrafiltrates of, 110
and erythrocyte magnesium in health and disease, 195
free fatty acids in man, effect of ethanol on, 826
human, normal and pathologic, evolution and decay of platelet-agglutinating activity in, 645

Plasma—Cont'd
lipolytic activity, effect of Lipomul infusion on, 558
and red blood cell lipids in patients with acanthocytosis, quantitative chromatographic analysis of, 357
Plasmacytoma, mouse, effects of heterologous transplantation of. I, 81
Plasmin-plasminogen fibrinolytic system in vitro, effects of serotonin on inhibition of, 25
Platelets in stored blood, stability of coagulation factors and metabolic activities of, 436
Platelet-agglutinating activity, evolution and decay of, in normal and pathologic human plasmas, 645
Poliovirus, isolation of, from spinal fluid, 490
Pollen, ragweed, antigen, standardization of characteristics of, by paper electrophoresis, 293
Polyvinyl alcohol sponge implants, histochemical and biochemical variations in connective tissue of, 713
sponge biopsy connective tissue, studies on lipid content of, 730
Porphobilinogen and delta-aminolevulinic acid in urine, quantitative determination of, 568
Posture, effect of, on cardiac response to increased peripheral demand, 1000
Precipitins, serum, in human and experimental brucellosis, 220
Pregnancy, progesterone-aldosterone interrelationships in, 588
Presidential address: research and the medical school, 3
Primaquine, hemolytic effect of. XV. Role of methemoglobin, 905
Progesterone-aldosterone interrelationships in pregnancy, 588
Proline-U-C^{14}, conversion of, to labeled hydroxyproline by rat cartilage in vitro: effects of hypophysectomy, growth hormone, and cortisol, 741
Proteins, blood, and lipoproteins, effects of iodinized contrast media upon electrophoretic mobilities of, 118
macroglobulin, I^{131}-labeled myeloma and, turnover and distribution of, 65
serum, estimation of eight, by gel diffusion precipitin technique, 859
Pseudouridine metabolism. I. Isolation and effect of diet on urinary excretion, 620
II. Urinary excretion in gout, psoriasis, leukemia, and heterozygous oroticaciduria, 852
Psoriasis, gout, leukemia, and heterozygous oroticaciduria, urinary excretion in, II. Pseudouridine metabolism, 852
Pulmonary histoplasmosis, acute, in laboratory workers, 236

R

Rabbit ear chamber, effect of amphotericin B on Histoplasma capsulatum infection in, 496
production of fever in, with extracts of tissue culture cells infected with Coxsackie virus, 986
Radiation syndrome, acute, caused by accidental exposure to $cobalt^{60}$, 655
Radioactive inert-indicator method for intestinal absorption utilizing differential counting, 513
Radioactivity measurement, incineration of fecal specimens for, 169
Radiocarbon and tritium-labeled cholesterol in alpha and beta lipoproteins after oral administration to humans, 550
Radiostrontium excretion in man, effect of chelating agent BAETA on, 445
Radioyttrium (Y^{90}), therapy of multiple myeloma with, 898
Ragweed pollen antigen, standardization of characteristics of, by paper electrophoresis, 293
Rat cartilage, conversion of proline-U-C^{14} to labeled hydroxyproline by, in vitro: effects of hypophysectomy, growth hormone, and cortisol, 741
renal function in, effect of magnesium depletion on, 211
Red blood cell lipids and plasma in patients with acanthocytosis, quantitative chromatographic analysis of, 357
Renal artery, effect of unilateral constriction of, I. Studies on mechanism of erythropoietin production, 815
excretion of hemoglobin in sickle cell anemia, with observations on spontaneously occurring hemoglobinemia and methemalbuminemia, 137
sensitivity of parathyroid-mediated response of: phosphate homeostasis, 387
function in rat, effect of magnesium depletion on, 211
tubular reabsorption of calcium and magnesium, organic mercurial effects on, and on phosphate excretion in dog, 630
Research and the medical school (presidential address), 3
Resin, ion exchange loaded paper, plasma amino acid chromatography with: assay of ϵ-aminocaproic acid, 7
Rhesus monkey, measurement of butanol-extractable iodide in, 672
Runting syndrome secondary to malignant tumors, I. Effects of heterologous transplantation of mouse plasmacytoma, 81

S

S^{35}-labeled trimeprazine tartrate, effect of sustained release on absorption and excretion of, 993

Secondary immune response, prevention of with 6-mercaptopurine, 542
Secretion of large molecular substances of gastric juice, effects of corticosteroids in human beings on, 575
Serotonin, cerebrospinal fluid, in brain tumor and neurological disorders determined by spectrophotofluorometric technique, 320
effects of, on inhibition of plasmin-plasminogen fibrinolytic system in vitro, 25
release by hydrochloric acid. I, 462
Serum acid glycerophosphatase activity in thrombocytosis, elevation of, 760
bile acids, total, fluorometric determination of, 681
pigments, study of, in jaundiced patients using the Eberlein solvent-partition method, 956
blood, infra-red analysis of Dicumarol in, 667
butanol-extractable iodines of people, differences in, 528
and cerebrospinal fluid, acid-base relations between, in man, 128
fluorimetric method for determination of phenylalanine in, 885
lecithin, lysolecithin, and sphingomyelin, measurement of, by simplified chromatographic technique, 335
precipitins in human and experimental brucellosis, 220
proteins, estimation of eight, by gel diffusion precipitin technique, 859
vitamin B_{12} levels, lognormal distribution of, and dependence of blood values on B_{12} level in large population heavily infected with Diphyllobothrium latum, 419
Sickle cell anemia, renal excretion of hemoglobin in, 137
Silicic acid chromatography, fractionation of bile lipids with, 364
Skeggs-Leonards hemodialyzer, modified, efficiency of, 932
Solvent-partition method, Eberlein, study of serum bile pigments in jaundiced patients using, 956
Spectrophotofluorometric technique, cerebrospinal fluid serotonin in brain tumor and neurological disorders determined by, 320
Sphingomyelin, lecithin, and lysolecithin, serum, measurement of, by simplified chromatographic technique, 335
Spinal fluid, isolation of poliovirus from, 490
Splanchnic nerves, effect of bilateral section of, II. Studies on mechanism of erythropoietin production, 821
Sponge implants, polyvinyl alcohol, histochemical and biochemical variations in connective tissue of, 713
polyvinyl, biopsy connective tissue, studies on lipid content of, 730
Staphylococcal control program, "successful," which failed, 596
Staphylococcal—Cont'd
endocarditis in dogs, experimental, study of. III, 481
penicillinase, evaluation of currently used methods for determining, 469
Staphylococcus, CO_2-dependent penicillin-resistant, producing dwarf colonies, human endocarditis due to strain of, 613
Strain of CO_2-dependent penicillin-resistant staphylococcus producing dwarf colonies, human endocarditis due to, 613
Syndrome, radiation, acute, caused by accidental exposure to cobalt^{60}, 655
runting, secondary to malignant tumors, I. Effects of heterologous transplantation of mouse plasmacytoma, 81

T

Technique, gel diffusion precipitin, estimation of eight serum proteins by, 859
Template and nontemplate methods, comparison of: microimmunoelectrophoresis, 697
Test, antiglobulin consumption, autoantibodies to thyroid tissue sediment detected by, 179
colorimetric, in HeLa cell system for assay of neutralizing antibodies to ECHO viruses, 687
fluorescent antibody inhibition, for histoplasmosis, 1033
rapid acid phosphatase, for evaluation of androgen activity, 705
thromboplastin generation, modified, detection with: influence of fat on blood coagulation, 327
urinary catalase, in hypertensive vascular disease, evaluation of, 847
Tetracycline dosage, effect of, upon eradication of staphylococci from tissues and upon development of tetracycline-resistant staphylococci, III. Study of experimental staphylococcal endocarditis in dogs, 481
Thalassemia, erythrokinetics in. II, 147
Thrombocytes and erythrocytes, human, identification of phospholipids in, 771
Thrombocytopenia in man, heparin-induced, 430
Thrombocytosis, elevation of serum acid glycerophosphatase activity in, 760
Thromboplastin generation test, modified, detection with: influence of fat on blood coagulation, 327
Thrombopoietic and leukopoietic effect of anemic plasma: factors controlling hemopoiesis, 262
Thymidine, H^3, study of effect of therapy on cells in blood of leukemic patients capable of incorporating, 412
tritiated, in tissues, counting of, 174

Thyroid administration, effect of, on erythropoiesis in dog, 926
tissue sediment, autoantibodies to, detected by antiglobulin consumption test, 179
Tissue, connective, in polyvinyl alcohol sponge implants, histochemical and biochemical variations in, 713
sponge biopsy, studies on lipid content of, 730
culture cells infected with Coxsackie virus, production of fever in rabbits with extracts of, 986
effect of tetracycline dosage upon eradication of staphylococci from, and upon development of tetracycline-resistant staphylococci, III. Study of experimental staphylococcal endocarditis in dogs, 481
thyroid, sediment, autoantibodies to, detected by antiglobulin consumption test, 179
tritiated thymidine in, counting of, 174
Trait, Hageman, studies on inheritance of, 980
Transplantation, heterologous, of mouse plasmacytoma, effects of. I, 81
Trimeprazine tartrate, S^{35}-labeled, effect of sustained release on absorption and excretion of, 993
Tritiated thymidine in tissues, counting of, 174
Tritium-labeled cholesterol and radiocarbon in alpha and beta lipoproteins after administration to human subjects, 550
Tubular reabsorption, renal, of calcium and magnesium, organic mercurial effects on, and on phosphate excretion in dog, 630
Tumor, brain, and neurological disorders, cerebrospinal fluid serotonin in, determined by spectrophotofluorometric technique, 320
malignant, runting syndrome secondary to, I. Effects of heterologous transplantation of mouse plasmacytoma, 81
Tumor-bearing hamsters, kinetics and loci of destruction of erythrocytes in, 638
Turpentine abscess, acute and chronic, erythrocyte survival in dogs with, I. Studies in anemia of inflammatory states, 244

U

Ultrafiltrates of human blood plasma, free amino acid levels in, 110
Unilateral constriction of renal artery, effect of, I. Studies on mechanism of erythropoietin production, 815
Urea, effects of, on physiologic system. I, 396
Urinary aldosterone determination, comparison of two methods for, 1026
bladder lesions and bacteriuria, 231
catalase test in hypertensive vascular disease, evaluation of, 847
excretion of acid mucopolysaccharides in normal children and patients with gargoylism, 95
in gout, psoriasis, leukemia, and heterozygous oroticaciduria, II. Pseudouridine metabolism, 852
isolation and effect of diet on, I. Pseudouridine metabolism, 620
Urine, one color method for determination of mercury in, 871
quantitative determination of porphobilinogen and delta-aminolevulinic acid in, 568

V

Valsalva maneuver in men and women, hemodynamic changes associated with, 275
Vascular disease, hypertensive, evaluation of urinary catalase test in, 847
Viremia, an attempt to demonstrate, in cases of Asian influenza, 1016
Virus, Coxsackie, production of fever in rabbits with extracts of tissue culture cells infected with, 986
ECHO, colorimetric test in HeLa cell system for assay of neturalizing antibodies to, 687
Vitamin B_{12} levels, serum, lognormal distribution of, and dependence of blood values on B_{12} level in large population heavily infected with Diphyllobothrium latum, 419

W

Waldenström ("purified" macrocryoglobulin), physicochemical studies of, 970
Water excretion, factors influencing, in anterior pituitary insufficiency, 833
Woman, man, and children, differences in serum butanol-extractable iodines of, 528
hemodynamic changes associated with Valsalva maneuver in, 275
obese, fasting ketosis in, 605

Y

Y^{90} (radioyttrium), therapy of multiple myeloma with, 898
